Amendments to the Specification:

Please replace paragraphs [0012] and [0017] with the amended paragraphs (these were published as paragraphs 14 and 20):

[0012] FIG. 4 is a block diagram of a ~~client computer~~ server in accordance with a second aspect of the invention.

[0017] The client computer 100 and the server 130 may include software and/or hardware for providing the functionality and features of the invention. The client computer 100 and the server 130 may therefore include one or more of: logic arrays, memories, analog circuits, digital circuits, software, firmware, and processors such as microprocessors, field programmable gate arrays (FPGAs), application specific integrated circuits (ASICs), programmable logic devices (PLDs) and programmable logic arrays (PLAs). The hardware and firmware components of the client computer 100 and the server 130 may include various specialized units, circuits, software and interfaces for providing the functionality and features of the invention. The invention may be embodied in whole or in part in software which operates on the client computer 100 and the server ~~120~~ 130 and may be in the form of an application program, an applet (e.g., a Java applet), a browser plug-in, a COM object, a dynamic linked library (DLL), a script, one or more subroutines, an operating system component or service, or a terminate and stay resident program (TSR). The hardware and software of the invention and its functions may be distributed such that some components are performed by the client computer 100, the server 130 and others by other devices.
